Charge Controllers are one of our top-asked technical questions. Specifically how to program charge controllers. Our Technical Specialist, David, takes us step-by-step in how to program your charge ...

I got several emails every day from people with questions regarding hardware and software modification for different rated solar panel and battery. A very large percentage of the ...

I quickly show you how to setup a simple solar charge controller like the one in this video.

Despite using a network cable, neither the charge controller nor the MT50 can be connected to a PC network port, a router, or any other network device. If you want to connect the charge controller to a ...

If you have any questions about how Nor-Cal can help with your PLC programming, SCADA commissioning or any other aspect of your solar PV plant controls, please schedule a call ...

Getting your solar charge controller settings right is vital for your solar power system's optimal performance and longevity. The settings cater to the specific needs of your battery and ...

HOW DOES ONE PROGRAM A PLC FOR SOLAR ENERGY MANAGEMENT? Programming a PLC for solar energy management involves a series of systematic steps. Initially, a ...

According to the open-circuit voltage (VOC) and the maximum power point voltage (VMPP) of the MPPT controller, the serial connection of PV modules suitable for different controllers can be calculated.

Take control of your solar power system with our guide to setting up a Solar Charge Controller. Start saving on energy bills today!

In this project we are going to build our own MPPT Solar Charge Controller using Arduino and by combining

Photovoltaic programming

panel

controller

many active-passive electronics. MPPT means Maximum Power Point Tracking ...
