The International Residential Code (IRC) and the International Energy Conservation Code (IECC) reference related standards that apply if installing, respectively, a residential or commercial PV system

ICC Digital Codes is the largest provider of model codes, custom codes and standards used worldwide to construct safe, sustainable, affordable and resilient structures.

The Solar ABCs is a centralized repository for collection and dissemination of documents, regulations, and technical materials related to solar codes and standards.

Download our free guide covering NEC purpose and development, code structure and organization, Article 690 for solar installations, and working with inspectors and AHJs.

Solar ready is a mandatory measure when there is not a PV system installed. Most new residential projects will have PV, unless meeting an exception.

Explore a searchable database of US construction and building code. Code regulations are consolidated by state and city for easier navigation.

Photovoltaic panels and modules shall be listed and labeled in accordance with UL 1703 or with both UL 61730-1 and UL 61730-2. Inverters shall be listed and labeled in accordance with UL 1741.

Photovoltaic panels and modules shall be listed and labeled in accordance with UL 1703 or with both UL 61730-1 and UL 61730-2. Inverters shall be listed and labeled in accordance with UL 1741. Systems connected to ...

As more homes and businesses are fitted with PV systems, it is important to understand that multiple codes and standards across different disciplines must be applied to ensure a safe installation for all.
