---

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems.

Get a clear explanation of solar panel cost per watt, what affects pricing, and how to compare quotes so you can make a smart investment in solar energy.

Photovoltaic or thin-film panels cost \$0.70 To \$1 per watt. While only lasting 14 to 17 years, they have a much higher heat tolerance than the other panels. You'll pay \$4,200 to \$6,000 to ...

Calculate and understand solar Price Per Watt (PPW). Compare installation costs, learn about regional variations, and make informed decisions about your solar investment.

As of 2025, the average solar panel installation cost per watt ranges from \$2.50 to \$3.50, including equipment, labor, and permitting. While larger systems require a bigger upfront investment, ...

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); ...

Solar panel cost by state January, 2026 Click on your state for solar panels cost localized to your city or use the solar calculator above to see the live prices from solar providers near you.

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data. ...

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to ...

## Price of photovoltaic panels calculated by wattage

Historic Low Pricing: Solar costs have reached all-time lows at \$2.56 per watt on average, with systems ranging from \$20,000-\$30,000 before incentives. Combined with the tax credit, ...

Calculating solar price per watt is pretty simple. Simply divide the cost of the system (in dollars) by the size of the system (in watts).  $PPW = \text{System cost} / \text{System wattage}$ . Now, solar systems are typically ...
