tems (BESS) are emerging as key enablers. Having energy storage in Chile is no longer a luxury asset but has become an "absolute necessity", explains Alejandro McDonough, business develop-ment ...

There are three approaches to energy storage available in Chile including Carnot Battery (thermal energy storage), battery energy storage systems (BESS), and liquid air energy storage ...

Having launched a national storage strategy in 2023 that sets targets and aims to attract investment in the sector, and with a large pipeline of projects on the way, Chile's installed storage ...

Despite the high solar irradiance in a significant portion of Chile's territory, neither residential nor commercial and industrial PV installations are expected to grow significantly, which will limit the ...

The share of renewables in Chile's power mix has been growing at a fast pace and reached 58% in 2023. This rapid growth has spurred existing project owners and new market ...

In 2025, Chile's energy sector saw a surge of green Power Purchase Agreements (PPAs) and associated investments, signalling a maturation of its renewable energy market. These ...

Battery storage and flexible gas generation are expected to play a crucial role in facilitating the transition. The importance of having enough energy storage capacity is clear from the rising amounts of ...

Solar and energy storage deployment is booming in Chile, spurred on by supportive government policy that has been markedly stable for 15 years. Indeed, the nation leads Latin ...

Through the deployment of cutting edge battery storage technology, Fluence is not only addressing the technical challenges of Chile's energy transition but also contributing to the nation's broader ...
