To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global Energy Monitor website.

Lithuanian solar developer SNG Solar has signed an agreement with the Freeport of Riga Authority to construct a 100 MW solar plant in the port of Riga. SNG Solar will build the 100 MW...

It is planned to create the largest solar panel port in Latvia with a nominal capacity of at least 100MW and a planned electricity production of at least 100,000MWh per year in the territory of ...

The project provides for the installation of solar panels, renewable solar electricity production and storage, as well as hydrogen and alternative fuel production.

It is planned in Riga, Latvia. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage.

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the installation of solar panels, the production and storage of renewable electricity, and the development ...

The Freeport of Riga will receive 2.5% of the green energy generated, which will support port infrastructure and operations. The plant is expected to produce about 100,000 MWh of green ...

Despite these seasonal variations in solar power generation potential, Riga's overall suitability for solar PV systems remains viable when considering annual energy production levels.

The solar initiative led by SNG Solar marks a transformative step towards reducing carbon emissions in the region. With a construction timeline set for five years, this ambitious plant will ...
