Discover all statistics and data on Energy storage in Europe now on statista !

Different studies have analysed the likely future paths for the deployment of energy storage in Europe. They point to more than 200 GW and 600 GW of energy storage capacity by 2030 and 2050 ...

Pumped-hydro storage (PHS) dominated the market, accounting for 53 GW of total capacity. Meanwhile, electrochemical storage reached 35 GW, with many installations in homes and ...

The EMMES 9.0 data highlights significant growth in the energy storage sector: increased deployment rates, larger energy storage systems, and a rising trend of co-locating storage ...

A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, LCP Delta has said.

This report is in the framework of an administrative agreement with the Directorate-General for Energy with the objective of developing the European energy storage inventory [1], a platform designed to ...

The EU, UK, Norway, and Switzerland together are expected to reach 100 GW of installed energy storage later this month, according to new analysis launched on Wednesday by LCP ...

This innovative tool systematically catalogizes all energy storage projects within Europe, from the first planning phase to operational operation.

The report, now in its ninth edition, compiled by the European Association for Storage of Energy (EASE) and LCP Delta tracks over 3,000 energy storage projects from over 27 countries to ...

In 2025, Europe's battery storage market entered a new phase of scale and maturity. With 27.1 GWh of new

capacity installed, the European Union achieved its 12th consecutive record ...
