Should schools integrate ICTs in their financial management practices?

IMPLICATIONS AND RECOMMENDATIONS It is recommended that for schools to successfully integrate ICTs in their financial management practices, they should set more flexible structures within which to accommodate recurrent ICT needs like breakdowns and training.

Does ICT facilitate school financial management?

CONCLUSION Literature shows that ICT enables efficient management of finances and improvement in accountability. A qualitative case study was undertaken in a school on five participants purposively selected from staff involved in financial management. The findings revealed that ICTs facilitate school financial management.

How do I create a sustainable school finance system?

Developing high standards and goals for public education is the first essential step in creating a strong, sustainable school finance system. Setting these goals and standards provides a clear target to aim for when designing a school finance system. Most state standards and goals typically fit within one or more of the following categories:
