-----

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the ...

Our five-year outlook foresees significant BESS expansion in Europe - a sixfold increase to nearly 120 GWh by 2029, driving total capacity to 400 GWh, yet falls short of energy transition needs.

With the solar, energy storage and e-mobility industry sectors gathering at the Intersolar event in Munich, Germany, this week, European solar PV trade association SolarPower Europe has ...

SolarPower Europe has officially launched the Battery Storage Europe Platform, a major new initiative to drive forward the business case and regulatory framework for battery storage across ...

One effective solution is the use of battery storage. Given the exponential growth in PV generation over the past years and its expected continued growth, this article examines the optimal ...

In order to deploy renewables and to release their potential for ensuring a stable and secure energy supply, Europe needs to work to overcome the intrinsic limits of renewables. One solution to these ...

In 2025, Europe's battery storage market entered a new phase of scale and maturity. With 27.1 GWh of new capacity installed, the European Union achieved its 12th consecutive record ...
