---

European Energy has announced the successful securing of EUR37.9 million in long-term project financing from Luminor Bank to develop a hybrid solar and battery energy storage project in ...

After having completed the first divestiture of a 265 MWp PV solar plant with Latvian state-owned utility Latvenergo in Nov 2024, we have now completed the second utility-scale project at ...

Once operational, it will be among the most advanced hybrid renewable facilities in Latvia. The storage system is designed to support grid stability, balance electricity supply and ...

Spanning around 96 hectares in the municipality of Saldus, the project will accommodate a 65-MW solar park and a 92-MWh battery energy storage system (BESS). Construction works are ...

This project marks a critical milestone for Latvia, as it combines a utility-scale solar park with a large-scale BESS. The integration of battery storage is a game-changer for the grid.

Clean energy investment company Niam Infrastructure and Estonian renewable power developer Evecon have announced plans to build a new solar-plus-storage portfolio in Latvia.

Investment firm Niam Infrastructure and developer Evecon will together deploy a solar-and-storage portfolio in Latvia that could have up to 26MW of BESS capacity.

The HNESS 230-L prioritizes storing and dispatching on-site solar generation to maximize clean energy usage, reducing reliance on external electricity. When solar output exceeds ...

Swedish investment firm Niam and Estonian developer Evecon have formed a partnership to implement solar energy and energy storage projects in Latvia. Under this ...

## Solar energy storage cabinet system for large electricity users in latvia

With its factory-direct pricing, high efficiency, long lifespan, and safety, HighJoule's Household wind and solar storage cabinet is an ideal energy storage system choice.
