-----

As solar energy plants require access to land and the electric grid, the recent uptick in solar energy infrastructure features interplay with local specificities. This article thus examines the uptake of solar ...

Summary: Portugal is accelerating its transition to renewable energy with groundbreaking storage technologies under the "Portugal 2030" initiative. This article explores cutting-edge solutions, ...

In the past few months Spain has announced a 2.5GW energy storage target by 2030 and Portugal is hosting a solar tender with a significant add-on option for storage.

The configuration of a solar photovoltaic system integrating energy storage in Portugal is yet unclear in the technical, energetic and economic point of view. The energy management jointly ...

The high restriction of renewables during peak solar radiation hours and the dependence on imports during non-solar and non-wind periods highlight the need for storage.

Portugal "s first renewable energy community (REC) was inaugurated in August 2021 in Miranda do Douro, a northern small rural village close to the border with Spain. The project was...

Portuguese energy giant GALP has announced construction of five battery projects, with a total capacity of 74 megawatts (MW), to store solar energy in Spain and Portugal.

GSL ENERGY"s energy storage solutions not only help Portuguese users effectively mitigate the risks posed by large-scale power outages but also provide a solid foundation for local ...

Portugal"s energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.
