What is a solar panel efficiency rating?

A solar panel's efficiency measures its ability to convert sunlight into usable electricity. If the sun shines on a solar panel with a 20% efficiency rating, 20% of the sun's energy will convert to solar energy in ideal conditions.

How efficient are solar panels?

While the most efficient solar panel for residential use sits at 22.8% efficiency, scientists have discovered a few technology advancements that have gotten solar panels to around 90% efficiency (but they convert sunlight to heat, not electricity) in a lab setting. This was first done in the early 2010s at the University of California in San Diego.
