Where to install solar photovoltaic panels?

For villa-type homes, the rooftop and surrounding open space usually belong to the private property of the family. Therefore, solar photovoltaic panels can be installed on the rooftop or in the open space in front of the house facing the optimal direction.

How do I install a DIY solar panel?

Below is your step-by-step guide to DIY solar panel installation. To determine an ideal system size, calculate your household's annual electricity consumption, then design a system that can generate that amount under your locality's weather conditions. Reference your electric bills for the power consumption data you'll need.

What should I consider before installing a solar panel?

The two things to consider before installing a solar panel process are- assessing your energy needs and determining whether your home or site is suitable for solar panels. Start by looking at your electricity bills to understand your average monthly energy consumption.

Should you install solar panels yourself?

Installing solar panels yourself can save you thousands of dollars while giving you more control over your renewable energy system. You can easily set up a DIY solar system if you're comfortable with basic construction, running power tools, and electrical wiring.
