What is a solar barbing system?

The goal of the Solar Barbing system is to supply clean power at all times ensuring a steady supply delivered through solar panels, battery and a solar controlling unit to the barbing salon ensuring that they retain their profits instead of spending it to pay for electricity or purchase of diesel.

Will a solar barbing system reduce unemployment?

The Solar Barbing System will not only provide electricity for existing barbing salons but will directly curb unemployment by creating new jobs for new barbers as the product is an all in one solar barbing shop and includes all the necessities for the start of a barbing shop without needing to rent a shop.

What does a barber shop package include?

It comes with full package and all necessary needs of a barbing salon; LED dimable light bulbs (for use at night), clippers, a standing fan, a radio, a mirror and a ten phone charging kit (with which they can sell electricity and make additional income). It is a full package that eliminates the need for a shop rental.
