Why do solar companies fail?

Now, we're peeling back the curtain to figure out why. Pol Lezcano, an analyst at Bloomberg New Energy Finance (NEF), said the major reason for the downfall of big residential solar companies in the U.S. is their fragile business structure. "These companies have very, very expensive business models, and they're running very, very thin margins.

Why are big solar companies struggling to survive?

Lezcano explained that there are "no economies of scale" in the big residential solar business because each additional sale requires a big upfront investment, and the payment won't come for months. The time it can take to see a return on investment is another reason why big solar companies are struggling to survive.

What solar companies went bankrupt in 2022?

In 2022, Pink Energy closed; in 2023, Vision Solar; and in 2024, we saw ADT Solar, Titan Solar Power, and SunPower shutter their operations. Longtime solar industry veteran Joe Marhamtati--who now co-owns solar software Sunvoy-- said he hasn't been surprised to see any of the national "big box installers" go bankrupt.

Why are solar stocks falling?

Several solar stocks have suffered double-digit declines. Renewable energy companies were already struggling to navigate high interest rates and the higher cost of capital over the past year, and the recent draft legislation has only exacerbated the sector's financial strain.
