This cabinet can economically house a variety of next generation electronic equipment including telco backhaul, fiber distribution, and radio equipment for wireless applications.

Professional-grade outdoor solar distribution box featuring advanced weather protection, intelligent monitoring systems, and flexible modular design for optimal solar power management and distribution.

Mini-Telecom Cabinets The Apollo Solar mini-cabinets provide all the electronics needed for smaller systems. Shown on the right: a mini-cabinet for a 500 watt system.

We work with our customers to create your design and build solar powered PV distribution boxes with easy access and egress of lines and cables without bends and tension.

They transform solar-sourced DC into AC and store unused energy in high-performance battery packs, providing clean, renewable backup energy to mission-critical telecom equipment.

The CNS team within MCA designs, customizes, and builds environmental enclosures to house and protect your organization's data communication devices. Our IP-rated solar powered NEMA ...

We design and manufacture high-quality custom enclosures, while providing professional assembly, system integration, and tailored support services for telecom, solar, and industrial equipment across ...

Manufacturing of cabinets designed for solar energy distribution and system control.

Combining solar power, energy storage, and communication power in telecom cabinets boosts reliability and cuts energy costs. Proper sizing of solar panels and batteries ensures stable ...

The solar power supply system of the communication base station consists of photovoltaic modules, array
