It covers the electrification of Gothenburg City's own vehicle fleet, public transportation, transports generated by Gothenburg City's purchases, and measures required to support Gothenburg's ...

EVolution Road was commissioned by the Swedish Transport Administration to build a test and demonstration site for electric roads. The purpose was to gain more knowledge about electric roads ...

Sweden is still considering how roadways could become more sustainable on a more attainable level, named Sweden's electric road. This could be the first step into a series of worldwide ...

Our mission is to develop and commercialise an energy harvesting electric road system, a modular, self-healing micro smart grid with wireless, mobile dynamic charging for electric vehicles.

Summary: Gothenburg's new wind and solar energy storage project aims to tackle renewable energy intermittency while supporting Sweden's 2030 carbon neutrality goals. This article explores the ...

Despite its potential for solar power generation, Gothenburg's climate presents some challenges that could impact energy production efficiency from photovoltaic panels.

The Smartroad Gotland (SRG) project is the world's first public wireless inductive Electric Road for heavy-duty vehicles located on the island of Gotland, south of Stockholm in Sweden's Baltic ...

This system uses coils placed under the road surface to create electromagnetic fields. Vehicles with receiver coils can turn this energy into ...

This system uses coils placed under the road surface to create electromagnetic fields. Vehicles with receiver coils can turn this energy into electricity, charging their batteries without wires.

Solar road power system in Gothenburg Sweden

The current electrified highway will be built on the E20 route between Stockholm and Gothenburg, one of Sweden's busiest highways, making it the ideal testbed for large-scale adoption.

The project is financed by the Swedish Transport Administration (Trafikverket) as part of the electric road roadmap of the Swedish government to reduce CO2 emissions from heavy transportation. The ...
