Spain invests EUR148.5M in solar-plus-storage projects, making battery systems mandatory for renewables and setting a new EU energy standard.

More than 182 MW of the battery energy storage systems (BESS) highlighted in Spain's Official State Gazette (BOE) are for hybridization with existing solar and wind generation capacity.

Spain's battery storage program expanded to EUR840M, funding 143 projects totaling 8.9GWh. Learn how this initiative creates opportunities for solar-storage hybrids and boosts grid ...

In November 2019, Iberdrola España inaugurated the first electrical energy storage system with lithium-ion batteries for distribution networks in Spain.

Spanish utility Naturgy Energy Group SA (BME:NTGY) said on Thursday it has started building its first battery energy storage system (BESS) projects in Spain, selected from a 160 ...

Despite the need, grid-connected battery storage in Spain remains in its infancy. Current operational storage assets are heavily skewed toward pumped hydro, with battery energy storage ...

The El Matorral solar plant will not only be capable of generating over 8 MWh of clean energy, but also features a lithium-ion energy storage system that allows more energy to be stored in ...

Naturgy has started construction work on its first battery storage projects in Spain; batteries that will hybridise the photovoltaic parks of Tabernas I and II, in the province of Almeria, and ...

By tying EUR351.6 MWh of storage to nearly 300 MW of new solar, the programme shifts Spain's

Spain new energy adds solar energy storage cabinet lithium battery station cabinet

renewables agenda from "sunlight only" towards an era where batteries capture and dispatch ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes ...
