---

Within the mechanism, a new prequalification call is on until February 14 for the design and build of utility-scale battery energy storage systems (BESS) and transmission connection ...

Kosovo intends to build the first battery energy storage system (BESS) in the region, which will have 170 MW of capacity and come online in 2028, a senior government policy advisor told Montel on Thursday.

The Resident Country Director of the Millennium Challenge Corporation, Rinor Gjonbalaj, highlighted that the energy storage system will be the first of its kind in the region. According to him, ...

Today we are here to mark a necessary and appropriate step in the development of Kosovo's energy sector, as we officially open the pre-qualification process for the construction of ...

**Battery Energy Storage Systems (BESS):** Implement BESS with a total capacity of 170 MW/340 MWh to support grid stability and integrate energy sources. **Future Preparedness:** Prepare for the future ...

**Enhanced Energy Security:** Battery storage can provide a dependable backup power source during power outages or peak demand periods, thus improving the security of energy supply. ...

Kosovo has taken a significant step towards a sustainable energy future by granting its first-ever licenses for battery energy storage systems.

One thing's clear: Kosovo's energy storage sector isn't just about keeping lights on--it's about powering economic transformation through technological leadership in the Western Balkans.

Enter the 200MWh battery storage project, funded by a \$234 million U.S. grant [1] [2]. This isn't just a Band-Aid fix; it's a leap toward grid stability and renewable energy integration. ...

# The future of battery energy storage in Kosovo

Are battery energy storage systems the future of electricity? In the electricity sector, battery energy storage systems emerge as one of the key solutions to provide flexibility to a power system that sees ...
