Behind the scenes, engineers, policymakers, and innovators are working to transform how energy is stored, distributed, and generated. Here are the technologies and policy reforms ...

Ofgem began work to develop the LDES cap and floor scheme as soon as it was announced in the government consultation response in October 2024. Ofgem opened the first ...

The UK's energy system relies on the storage of fossil fuels to manage variations in supply and demand over varying timescales. As these are replaced to meet the net zero emissions target, new types of ...

On 10 October 2024 the UK Government gave the green light to a cap and floor scheme to help bring long duration energy storage (LDES) projects to market. LDES projects include pumped storage ...

Long-duration energy storage technologies store excess power for long periods to even out the supply. In March 2024, the House of Lords Science and Technology Committee said ...

There has been a shift in the pipeline for current and future long duration electricity storage (LDES), from over 7.2GW in December 2023 to 10.5GW in May 2024. In January, the Government ...

Battery Management Systems vary - there are no statutory requirements or engineering specifications, so not all current safety features are present in all sites.

Ofgem is today (Tuesday 23 September) confirming the 77 projects entering the final assessment stage of a government-driven "super battery" support scheme designed to secure investment, promote...

As the UK grid transforms faster than a Prime Minister's cabinet, one thing's clear: energy storage isn't just about electrons in boxes. It's about rewriting the rules of power - literally.

Uk cabinet energy storage system transformation

Government will unlock investment opportunities in vital renewable energy storage technologies to strengthen energy independence, create jobs and help make Britain a clean energy ...
