Enhance sustainability and cut energy costs with renewable energy solutions for schools, colleges, and universities. JLM Energy provides solar PV, battery storage, and energy-efficient systems to help ...

Solar installation across educational institutions represents an innovative approach to reducing energy costs and carbon emissions across primary schools and universities.

Modular classrooms are built with high-quality insulation, energy-efficient windows, and modern heating systems. They can also include solar panels or heat pumps, helping schools reduce ...

For schools, we offer fully funded solar and battery storage systems that require no upfront investment, designed to align with daytime energy use and term schedules--helping you meet net zero goals ...

Learn more about our various education packages, to select the most suitable for your school. Our education offering is suitable for schools around the world, and can be tailored to any age group.

23 schools have now installed Great British Energy solar panels and are cutting their energy bills, from Notre Dame RC School in Plymouth to Christ The King RC Primary School in ...

We've installed solar PV systems, LED lighting solutions and battery storage set-ups in schools, resulting in reduced bills and a resource to educate the next generation.

Discover how modular school buildings deliver faster, greener and flexible learning spaces across the UK, supporting rising demand, sustainability and modern education needs.

Accelerating the UK's Net Zero transition with fully funded solar carports, battery storage, and energy-positive buildings for schools and public estates.

Uk schools use solar-powered mobile modular energy storage systems

Our suite of energy storage solutions, including cutting-edge battery systems and automatic changeover switches, is designed to revolutionise the energy landscape of educational ...
