---

The base station's RF circuitry is housed in a small outdoor module known as a remote radio head (RRH) or remote radio unit (RRU). RRH performs all RF functions such as transmit and ...

In a cellular network (like 4G or 5G), the base station is often referred to as an eNodeB (for 4G) or gNodeB (for 5G). They are typically mounted on towers, rooftops, or other structures to maximize ...

A small cell base station is a type of wireless communication infrastructure that is designed to enhance network capacity and coverage, particularly in areas with high user density or ...

Experience CableFree's 4G & 5G LTE Small Cell outdoor base stations with software-defined radio for great flexibility, high performance & low operation costs.

To address this challenge, more MNOs are deploying small cell networks to serve dense urban and suburban areas, as well as providing service for large events. Small cells play a critical role in high ...

Ericsson's outdoor micro radio series provides seamless mobility for users moving in and out of the small cell coverage area. These radios have the best in class design, superior radio performance ...

A small cell is a cellular base station that transmits and receives defined RF signals with low power in a compact solution.

CableFree offers Band 46 5GHz LTE Base Station and Outdoor CPE devices for 4G/LTE operation in Unlicensed 5GHz spectrum, enabling smaller operators and private customers to build LTE without ...

Small cells are exactly what you likely think they are: small cellular base stations designed specifically to add additional capacity over small coverage areas. They're often used outdoors to add ...

# What are the outdoor small signal base stations

New street and outdoor small-cell solutions from Ericsson can be mounted on existing infrastructure. They are fast to install, with a subtle footprint, and secure the 5G experience.

Experience CableFree's 4G & 5G LTE Small Cell outdoor base ...
