Can Lesotho export wind power?

Breeze Power, a company owned jointly by GOKL and Harrison & White Investments, is investigating twelve sites for wind power generation. Energy demand is growing in South Africa and the rest of the region, and Lesotho has the potential to export renewable power.

Who controls the energy sector in Lesotho?

There are other Ministries or agencies with overarching influence over the energy sector: Ministry of Development Planning; Ministry of Finance; Ministry of Mining; Ministry of Public Works and Transport; Water Commission; and Lesotho Revenue Authority. Lesotho Electricity Corporation (LEC) generates, transmits, and distributes electricity.

Can Lesotho produce 450 MW of hydropower?

According to Lesotho's Department of Energy, Lesotho could potentially produce 450 MW in hydropower and several hundred more with wind power. However, only 17 percent of this potential is being exploited, 96 percent of it at the Muela hydro-power plant and the rest from mini hydro-power plants at Mants'onyane, Mokhotlong, Tsoelike, and Semonkong.

Does Lesotho need electricity?

The country is renowned for an abundant supply of unspoilt and unexploited water resources, capturing approximately 50% of Southern Africa's total catchment run-off, therefore, hydropower contributes to most of its electricity needs. When it comes to energy access, Lesotho is considered one of the lowest in Africa.

**Introduction** The Kingdom of Lesotho is an enclaved, landlocked country in southern Africa completely surrounded by South Africa. It is just over 30,000 km<sup>2</sup> (11,583 sq mi) in size and has a population ...
