---

This file contains a wind turbine model. It includes a three-dimensional mechanical model of the tower, nacelle, and blades modeled in Simscape Multibody, hydraulic pitch actuators, electrical ...

The windpowerlib is a library that provides a set of functions and classes to calculate the power output of wind turbines. It was originally part of the feedinlib (windpower and photovoltaic) but was taken out to ...

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

FLORIS 4.0 introduces a simple model for the "helix" active wake mixing wind farm control strategy. This strategy uses individual pitch actuation to enhance wake recovery and ...

The windpowerlib is a library that provides a set of functions and classes to calculate the power output of wind turbines. It was originally part of the feedinlib (windpower and photovoltaic) but ...

Run simulations of hourly power output from wind and solar PV farms by clicking anywhere on the map, choosing your technology from the side menu, and hitting "Run".

Knowledgebase for the windPRO software, its online-data and wind-energy models. This page holds manuals, quick-guides, videos and technical-notes.

Wind generator 3d mobile. mobile unit to generate electric energy through a wind generator or photocells; equipped with storage facility.
