France is aiming for a target growth rate of 1.5 gigawatts (GW) per year in onshore wind power, Energy minister Olga Givernet said on Wednesday, which would be in line with the previous...

...

Wind and solar power capacities jointly represented 56% of France's renewable power capacity. Wind power alone represented one-third of total renewable electricity production and 8.3% of national ...

Most international wind turbine manu-facturers contribute to the French wind industry, with facilities from large wind turbine suppliers such as GE, Siemens- Gamesa, and an LM Windpower blade factory.

Wind power was one of the leading electricity sources in France, with over 50 terawatt-hours generated in 2023, placing France among the most important wind power producers in the...

Here above you will access information on wind energy forecast for the French grid : Reference forecast : generation forecasted available since 6:00 PM for the complete day ahead.

Data and information about Wind power plants and their location plotted on an interactive map of France.

In 2019, Emmanuel Macron (President of France since May 2017) confirmed France's pledge to add 1 GW offshore wind every year between 2020 and 2024 as laid out in France's new draft energy plan ...

Wind power accounted for 14% of France's total installed power generation capacity and 9% of total power generation in 2023.

France's wind energy sector is on a strong growth trajectory, with 23.8 GW of installed capacity as of mid-2024, including 1.5 GW of offshore wind. While onshore wind remains dominant, offshore wind is ...
