In late 2023, developer Orsted canceled the 2,400-MW Ocean Wind 1 and 2 projects in New Jersey, citing rising interest rates, high inflation, and supply chain delays.

All five offshore wind projects halted by the Trump administration in December can resume construction following a federal judge's ruling on Monday that cleared Denmark's Orsted to proceed with...

The Trump administration's decision to pause five offshore wind projects will have reverberating impacts on the nation's energy sector, according to experts in renewable energy.

WASHINGTON -- The Trump administration said Monday it is pausing leases for five large-scale offshore wind projects under construction along the East Coast due to what it said were national...

Vineyard Wind 1 can continue to generate power from its already operational turbines during the 90-day suspension. State leaders and lawmakers have criticized the pause, calling it an attack on...

The Jackalope Wind project would span an area the size of Chicago, with hundreds of wind turbines generating clean electricity by 2027.

Explore the impact of canceled power generation projects in the U.S. across solar, wind, and battery storage sectors, driven by grid constraints and data centers.

The Trump administration on Monday ordered a halt to five offshore wind projects currently being built in the United States, a major new attack on a power-generating industry even as voters...

In the latest blow to the US offshore wind industry, the Trump administration announced Monday it is suspending the federal leases for all large offshore wind projects currently under...

Wind power project suspends power generation

The Trump administration is suspending leases for five large-scale offshore wind projects under construction on the East Coast due to what it said were national security risks identified by the Pentagon.
