---

The project is scheduled to be operational at full capacity in 2023. The Kela project is the first hydro-photovoltaic power station to begin construction during the 14th Five-Year Plan period (2021-25) in ...

Kela PV Power Plant Phase I, in the Yalong River Basin in China's Sichuan Province, covers around 16 million square metres and combines solar & hydropower

On a snowy mountain at an altitude of 4600 meters in western Sichuan, rows of blue PV panels are generating electricity from solar energy, while the Yalong River is roaring in the distance. ...

The Kela PV Power Plant, located in the Yalong River Basin in China's Sichuan Province, developed by Huawei, was a finalist for The smarter E AWARD 2024 in the Outstanding Projects ...

Constructed by Yalong River Hydropower Development, also known as Yalong Hydro, the Kela station aims to expand the renewable energy capacity of the Yalong River basin and ...

Lauded as the largest facility of its kind in the world, the Kela PV power station is strategically located in the Yalong River Basin, nestled within the Tibetan Autonomous Prefecture of ...

The Kela Photovoltaic Power Station is the world's largest integrated hydro-solar power station, and the first under-construction integrated hydro-solar power station of the Yalong River ...

On July 8, 2022, the world's largest hydro-solar hybrid power station Yalongjiang Kela photovoltaic power station started construction in Yajiang County, Ganzi Tibetan Autonomous Prefecture, ...

The Kela PV Power Plant is located in the Yalong River Basin in China's Sichuan Province, at an altitude ranging from 4,000 to 4,600 meters. The project covers an area of around 16 million square meters, ...

# Yalong River Kola Photovoltaic Energy Storage Project

China is a global leader in developing renewable energy, and the Kela photovoltaic (PV) power station is adding to the country's energy mix as the world's largest hybrid solar-hydropower ...
