As the photovoltaic (PV) industry continues to evolve, advancements in Zifengshan Wind Power Generation have become critical to optimizing the utilization of renewable energy sources.

From steppe to power source, China's wind energy sector is revolutionizing the country's electricity supply and taking on a global leadership role. With its vast landmasses in the north and an...

China's installed wind power generation capacity has consistently ranked first in the world for an impressive 15-year streak, according to the latest data released by the China Electricity ...

China is racing to develop a new generation of wind farms that can not only survive tropical cyclones, but also harness their power.

To meet China's goal of carbon neutrality by 2060, substantial investment in upgrading power systems needs to be made to optimize the deployment of new photovoltaic and wind power ...

A record-breaking 20-megawatt (MW) offshore wind turbine has been connected to China's grid in the Fujian Province.

The wind turbines of this wind farm are set up between 5000 and 5200 meters above sea level, with a total installed capacity of 72.6 megawatts and a total of 25 wind turbines installed.

China's floating offshore wind prototypes The global deep-sea floating offshore wind is still in the pilot demonstration stage. By the end of Sept. 2024, 5 semi-submersible wind turbines have been ...

China's 1.4 TW operating solar and wind outstrips thermal power In Q1 2025, China's wind and solar capacity surpassed its thermal (coal and gas) capacity for the first time, supplying nearly 23% of the ...

By working closely and cooperatively with partners ZF Wind Power ensures innovative designs that meet

Zifengshan Wind Power Generation

performance and reliability requirements. Find out how advanced wind gearboxes, powertrains ...
